# C-332 Two Door Access Controller

Introduction

C-332 Two doors access control board adopts 32-bit core processor combined with mass FLASH memory development and design, realizing LAN and WAN communication network, which can be used in banks, communities, schools, enterprises and other places.

Functions :

Conventional Function : Offline Operation, Reading Card Unlocking, Passwords Unlocking, Reading Card+Passwords Access, Card+Passwords Unlocking, Manual Input Card Number + Passwords Unlocking, First Card Unlocking, Normal Card Unlocking, Remote Unlocking, Remote Locking, Unlocking at definite time Period, Normally Open, Real Time Supervision, Abnormally Supervision, E-map, Duress Alarm, Fire Alarm Linkage, Robber Alarm, Illegal Break In Alarm, Illegal Card Alarm, Missing card Management, Black list Card Alarm, Door open time out Alarm/Prompt, Anti-passback And Uploading Small Group Data, Uploading Dual Door Interlocking, Multi-Door Interlocking, Multi-Card Unlocking, Keypad Programming, Emergency Locking, Time Attendance, 64 Groups Time zone, Holiday, time zone and etc.

Professional Function : Card Data Recovery, Logs Repair, Protection, swiping card and validation, Full Cards unlocking, Full Cards Unlocking + Auto Register, Program IC Card, Main Board Buzzer Switch, Clock Self-Adjust, Unlocking Based On Internal And External Validation, 3+1confirmation unlocking, Indoor Population Checking, 5 devices work together, Cross boards interlock 、 Cross Boards anti-passback, AB groups multi-card unlocking, telephone inform once trigger alarm , operation time display, remote firmware upgrade and etc.

New function : Except the function above, we have also added some new functions that other suppliers do not support : Abnormal detection of the card reader circuit and voice prompts, voice prompts and guide, system temperature detection, Power input stability detection, Trial period, online patrol management, voice prompts if the card close to expiration date, daily intelligent self-correction of time error, Exit Switch available during valid time zone, remote phone taking when swiping card, Anti-theft alarm host function, time interval setting of twice swiping card, Door magnetic alarm time management, encrypted communication data, swiping card times setting, capacity expansion 2~4 times depends on customer demand, WEIGAND keyboard program card and etc.

Product Parameters

Product Name: Two Doors Access Control Board

Working Voltage: DC12V

Working Current: <350mA

Temperature: -25℃-70℃

Humidity:10-90%RH

Door Control: 2

Readers: 4

Exit Button: 2

Inbuilt Door Sensor Interface: 2

Inbuilt Fire Linkage: 1

Inbuilt Bandit Alarm: 1

Inbuilt Voice Speaker: 1

Reading Protocol: Wiegand 26 \ Wiegand 34 \ Wiegand 66

Register cards: 1,20,000

Record Capacity: 3,00,000
Communication Type: RS485 + TCP/IP

Communication Distance: RS485（1200mtr.）TCP/IP（100mtr.）

Wiegand: 80 mtr.

Size: 150 * 105 * 20 mm

Color: Black
